Personal profile

I am a fresh, quick learning UX/UI and graphic designer with a strong passion for product design and understanding users behavior. I have an endless thirst for knowledge and a strong desire to improve my skills and myself every day

I have both creative and technical strengths, with focus on problem-solving through understanding the core of the problem

Work Experience

Elia Engineering | Transportarion planner (2022 - 2025)

Transportation consulting for private corporations and local authorities as part of transportation and engineering projects of varying scales

- Using data to generate insights and implement data-driven decisions in practice
- Using advanced software and models to generate future forecasts
- Working on both team-based projects and individual indeoendent projects

Bar Technilogies | Municipal assets consultant (2020 - 2022)

Collecting and analyzing data and providing real estate-related consulting for local authorities based on the findings

- Working as a part of a team on large-scale projects that require thoroughness and precision
- A high level of responsibility, as mistakes or lack of attention can result in significant financial costs
